

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Millersview-Doole WSC has violated the monitoring and reporting requirements set by the Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During [compliance period] we [did not monitor or test - or - did not complete all monitoring or testing] for [contaminant(s)] and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were [or will be] taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
Water quality parameters - Distribution System	3	3	10/28/2024-11/30/2024	11/14/2024
Water quality parameters - Entry point to the Distribution System	2	2	10/28/2024-11/30/2024	11/14/2024

What is being done?

We are working to correct the problem.
